

Qualified Registries for the 2010 PQRI and Electronic Prescribing Incentive Programs

CMS is pleased to announce the registries that have become “qualified” to submit quality data to CMS on behalf of their eligible professionals for 2010 PQRI reporting (see table below). Each of these registries has gone through a thorough vetting process including checking their capability to provide the required PQRI data elements, reviewing a measure flow (this checks to see whether the registry calculates the measure’s reporting and performance rates correctly), and transmitting the required information in the requested file format (XML). Some registries are also capable of reporting the electronic prescribing measure to CMS as listed in the table below. While the listed registries successfully completed the vetting process, CMS cannot guarantee that any or all of the listed registries will be successful in providing the required information on behalf of their eligible professionals for the possible payment incentive. This list, however, represents those registries who successfully submitted data for 2008 PQRI in early 2009 on behalf of their eligible professional clients. **Additional 2009 “qualified” registries (who have completed the vetting process) will be submitting 2009 PQRI data in early 2010 and will be added to this list if their data submission is successful (list update anticipated Spring 2010). Finally, there is a new self-nomination process currently underway which will allow other registries to become “qualified” for 2010 PQRI participation. We expect to complete the vetting process and post the names of the new registries by the summer of 2010.**

Eligible professionals who wish to participate in 2010 PQRI using one of the registry-based options may contact the registries listed below for additional details on participation options.
